I founded C. E. RAY COMPANY in 1966 as a Manufacturers' Representative for products in the HVAC-R and HYDRONICS market. After a *Learning Curve* period with basic commission lines, we evolved into a sales-service company with an emphasis on Equipment Application Design.

My two sons, Andy and Steve, joined our company in the 1980s. We sell equipment through our network of loyal customers, and we specialize in calculations and equipment application designs (at no charge) to serve our customers with the most economical marketing system.

We designed and patented software specifically for the Overhead Radiant Tube-Heating systems, which calculates and prints Heat Loss, projected annual fuel costs for "Forced Air" heating, and it projects the annual fuel costs for our Radiant Tube-Heating equipment. The difference between these two projections is the Annual Fuel Savings (reported in Dollars) a customer can expect from his investment in *High Efficiency* radiant heating. We also can calculate the *Reduction* in CO₂ between these two media of commercial and industrial heating on an Annual basis (reported in Tons per Year).

We take seriously the applications for Ventilation Equipment, Make-Up Air equipment, *INFLOOR* radiant floor heating, Energy Recovery with Brazed-Plate Heat Exchangers and Energy Economizers for Boiler flues and other related industry products.
